# ZIPPER PULL INSTRUCTIONS

FOR BACKPACKS, CASES, ETC.

**1** Use a tool to carefully pull the zipper open.

CAUTION: Take care when lifting tab to not break it.

2 Once zipper is open, take the old zipper pull out.

3 Take the new zipper pull, pushing your thumb on the gate of the loop. This will allow you to hook the new zipper pull in the opening of the zipper.

4 Use a tool to push the metal opening back in place so the new zipper pull does not fall off.
