

Install

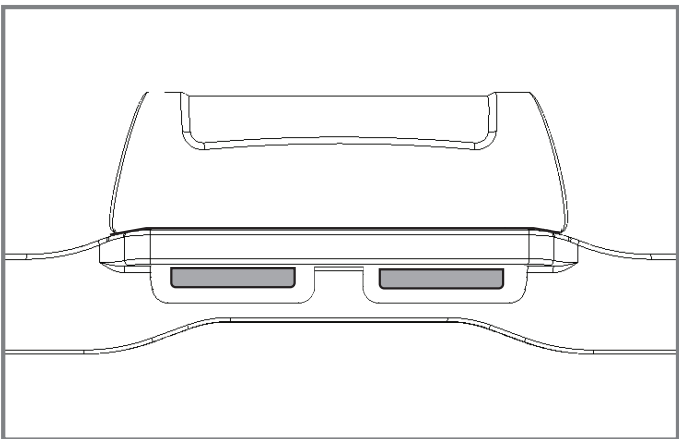

1. Before installing the stylus holder, see the back of each for which size you would like to install.

2. Insert one of the back prongs into the slot on the case.

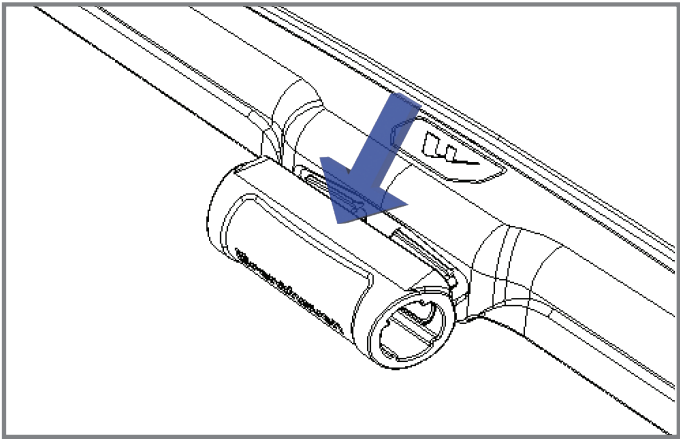

3. Once one end is inserted, push the other side into the second slot.

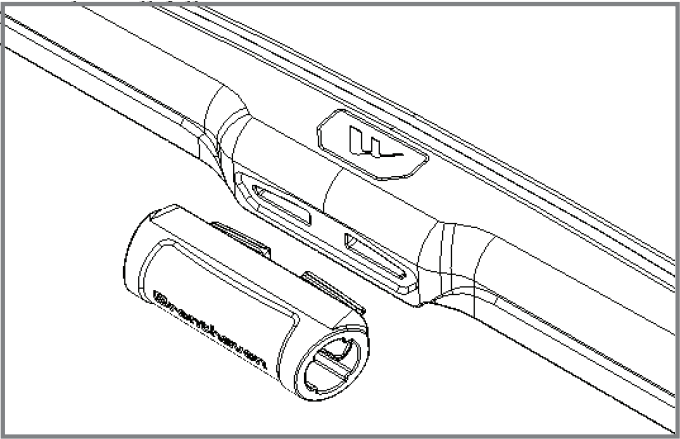

4. To ensure that the stylus holder is properly installed, make sure the prongs are fully visible from the inside of the case.

Removal

1. Having a secure grip on the stylus holder and the case, pull the stylus holder down until it releases from the case.

2. Make sure not to pull the stylus holder straight out or to the sides as it may damage the holder or case.
