

## Instructions

1. Attach cord to Power Adapter.
2. Attach power adapter to the back side of Power5.  
A blue light will indicate the unit is properly plugged in and turned on.

3. Install your Protect+ case and device into the Power5 by aligning the bottom middle of the case with the middle of the charging station.  
To ensure that the device is charging, look at the charging symbol to indicate power.  
Note: To use Power5, user must have Protect+ compatible cases on devices. The cable free adapter needs to be installed prior to using Protect+ cases with Power5 to ensure proper charging. Please refer to separate install instructions on Protect+.

## Troubleshooting

- If the unit doesn't appear to turn on, check that the adapter is plugged into the AC outlet properly. Also check that the output of the adapter is plugged into the unit properly.
- If the iPad device is not charging, check that the device is seated properly into the middle of the bay. Ensure that the contact points are free from dust. Brush or wipe any debris with dry paper/towel (NO water and or cleaners).

## Safety

### Read All Instructions Prior to Using the Charging Station

- Always unplug the power adapter before moving the product.
- Use this unit only for its intended use as described in this manual.
- Disconnect the charger during lightning storms or when not intended to use for long periods of time.
- Do not use cables that are damaged.
- Keep the station away from water.
- Do not place unit in, drop, or submerge in water or other liquid.
- Keep the unit away from a direct heat source and direct sunlight.
- Keep unit in a well ventilated area.
- Do not place the station close to flammable liquids or gases.
- This product is designed to be used indoors only.
- Do not block the ventilation holes.
- To avoid the risk of electric shock, do not disassemble or attempt to repair the unit. Incorrect repair can cause risk of electric shock or injury when unit is used.

### Warning

Class I Equipment. This equipment must be earthed. The power plug must be connected to a properly wired earth ground socket outlet. An improperly wired socket outlet could place hazardous voltages on accessible metal parts.

### Avertissement

Équipement de classe I. Ce matériel doit être relié à la terre. La fiche d'alimentation doit être raccordée à une prise de terre correctement câblée. Une prise de courant mal câblée pourrait induire des tensions dangereuses sur des parties métalliques accessibles.

## FCC

We declare under our sole responsibility that the above referenced product has been tested according to FCC requirements and this device complies with \*part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

## Product Specifications

Device Capacity	5 Bays
Dimension	Station: 8.5in x 6in x 3in (215mm x 152.5mm x 78.5mm) Power Supply: 5.4in x 2.7in x 1in (136.5mm x 68mm x 25mm)
Weight	Station: 1.67lbs (760G) Power Supply: 1.13lb (514g)
Regulation / Certification	FCC Part 15 Non intentional Radiated & Conducted Emissions, Class B limits ICES-003 RoHS Compliance 2011/65/EC UL Certified
Power Specification	Input: 100-240 VAC 1.8A max Output: USB PD3.0 5V/3A, 9V/2.22A, 12V/1.67A 20W max
Temperature	Operating: 0° C to 40°C Non Operating: -10° C to 60° C
